

***Bearing Accessories  
Pillow Blocks  
And  
Contract Machining***

## Welcome to Standard Locknut, LLC

The industry standard for the highest quality machined parts! These are the terms our customers have come to know us by.

We are recognized in the industrial market place as the premier supplier of **bearing retention products** including locknuts, lock washers, seal rings, adapter sleeves and, split pillow blocks, as well as our ability to **manufacture custom precision machined components**.

For more than 60 years, Standard Locknut, LLC has been supporting OEM and MRO requirements for rotating equipment in the bearing, steel, rail, oil and gas, aerospace, mining, chemical, machine tool, agricultural, heavy duty and off-road industries with the **highest quality precision machined products** on time and error free.

*"At Standard Locknut, we define the  
Industry Standard for precision machining"*

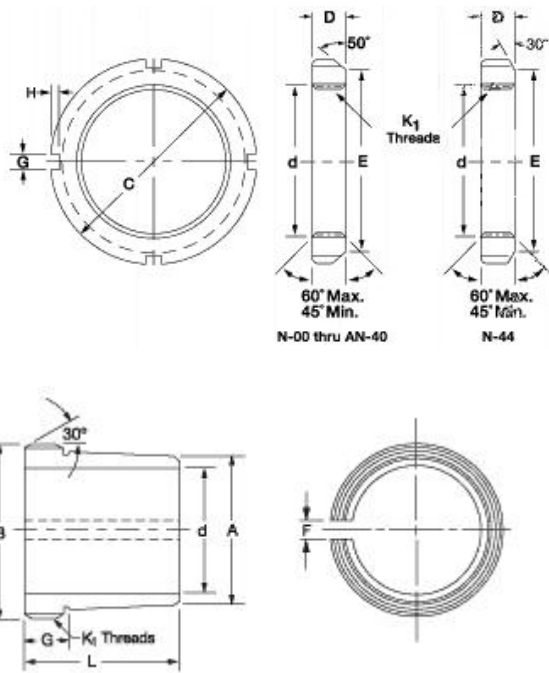

Quality certification

**ISO 9001:2015**

# Bearing Accessories

Critical to any successful bearing installation is the means of securing the bearing to the shaft. That's where we come in.

Our line of locking devices includes adapters and sleeves, washers, lock-nuts and lock washers. Available in metric and inch series, our accessories are manufactured to ABMA, SAE and ABEC standards

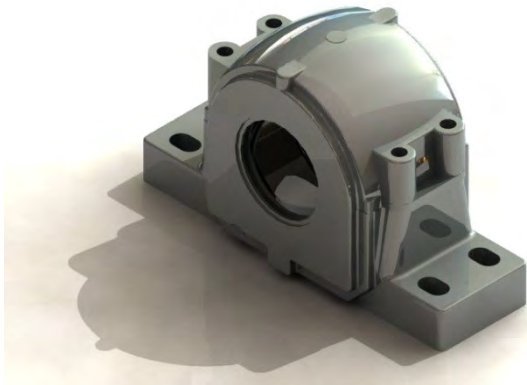

Standards off the shelf accessory products have been designed into numerous industrial applications for years.

Need to customize a standard part or design a unique retention product?

Standards team of engineers and experience machinists are well equipped to help you with your design

We supply our standard split-pillow blocks to all corners of the globe. Typically used with a spherical bearing, the housing may be your most important purchase.

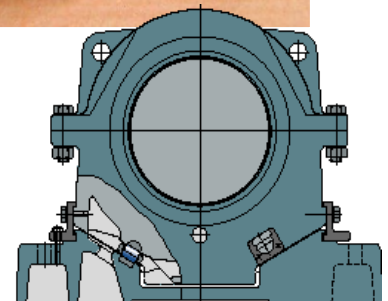

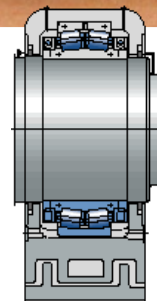

It all starts with the castings. We control our quality of pillow blocks by using castings from molds designed and owned by Standard.

We supply the industry in sizes from 511 up to 056 in SAF and SAFS. Cast iron, ductile iron or steel, along with the LER seals and stabilizer ring, we're prepared to support your pillow block needs.

We also machine customer-supplied pillow blocks, both standard and specials, for those unique and demanding applications.

Either way, our customers have come to depend on us for our reliability, quality and delivery.

***Made in the USA, you can count on it.***

SAF Pillow Blocks

# Contract Machining

Our focus isn't just the machining portion; we pride ourselves on learning as much about the application as we can. Armed with this information, we're prepared to offer cost savings ideas and opportunities.

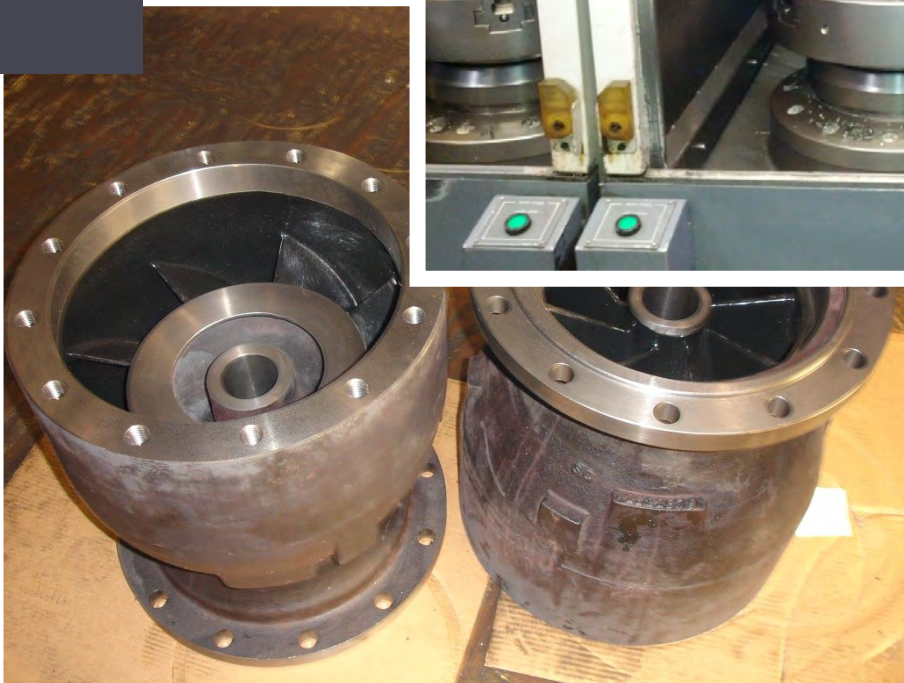

Gear blanks, pump housings, shafts, impellers, eyelets and "green" bearing races, up to 52" in diameter, represents just a sample of the contract machining we've done for the automotive, aerospace, heavy equipment, bearing, gear and railroad industries.

Cast iron, aluminum, steel, ductile iron are just some of the materials we've machined. Our experience in different materials makes us ideal for dealing with different machining problems.

We are ISO 9001:2015 certified so we understand the importance of quality and delivery.

# Contract Machining

Our engineering staff is instrumental to quality contract machining.

State of the art CNC machining and secondary operations such as broaching, milling, drilling and tapping are part of our core competency.

Manned by highly skilled and trained personnel, Standard Locknut understands the importance of quality, delivery and performance.

We are your one-stop source for contract machining.

# Standard Locknut, LLC

*"We will meet or exceed all customer expectations  
and continually improve everything we do."*
